## THE EASY CHOICE

**Bold Design. Superior Functionality.**

EasyTrim Reveals<sup>®</sup> is a complete two-piece, exterior aluminum trim system compatible with the most popular lap siding and panel options on the market. EasyTrim Reveals<sup>®</sup> is the go-to for both residential and commercial projects across North America.

- |                        |                       |
|------------------------|-----------------------|
| ➔ UV / Fade Resistant  | ➔ Maintenance Free    |
| ➔ Full-Edge Protection | ➔ Moisture Management |
| ➔ Anti-Corrosive       | ➔ No-Sharp Edges      |

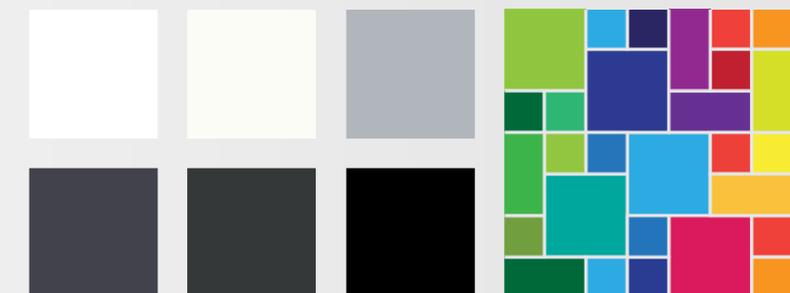

### The Easiest Choice to Make

More than just a trim solution, EasyTrim Reveals<sup>®</sup> significantly reduces installation time and enhances the building's exterior performance, minimizing the need for ongoing maintenance. Our Fit and Finish<sup>™</sup> system features overlapping trims that protect siding from moisture and harsh elements. This design not only preserves the aesthetics but also extends the life of your building exterior, making EasyTrim Reveals<sup>®</sup> the smart choice for long-lasting quality.

# Round Outside Corner

Category  
Outside Corner

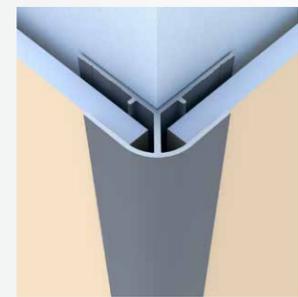

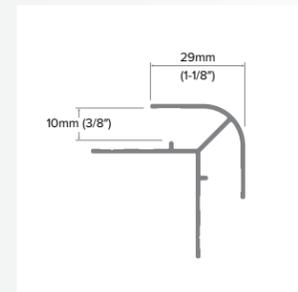

Length  
10'

Series  
5/16"

## Description

The Round Outside Corner gives a soft flowing look while providing the protection and durability required for heavy traffic areas where carts and other components will often bang into the corner. It also features our patented EZ.Bump® for full water management, caulk-free installation, and Fit & Finish.

# Soffit J

Category  
J Trim

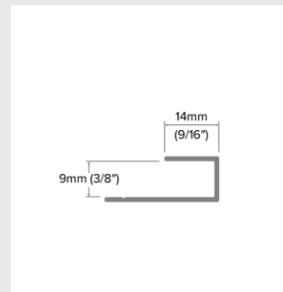

Length  
10'

Series  
5/16"

## Description

The Soffit J is designed to run horizontally and is used for finishing/capping the top of the panels when transitioning into a soffit area or when otherwise required. This profile is distinguished from the General J by its smaller profile depth ensuring the panel has a tight fit to the profiles tab providing a clean gap-free appearance when viewed from below.

# 2-Piece Outside Corner Transition

Category  
**Outside Corner**

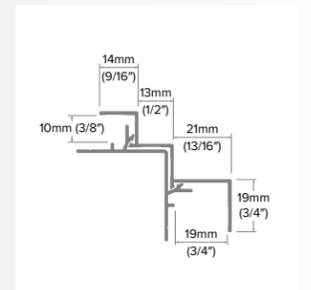

Length  
**10'**

Series  
**5/16" to 3/4"**

## Description

The 2-Piece Outside Corner Transition gives the same distinct shadow lines as our other Square Outside Corners while giving the advantage of almost seamlessly transitioning between the two siding depths available in the EasyTrim® system. Reversible, it offers a 1/2" opening on one side for panel installation and 3/4" on the other for lapped plank and 3/4" natural wood products.

# Multi-Angle Outside Corner Transition

Category  
Outside Corner

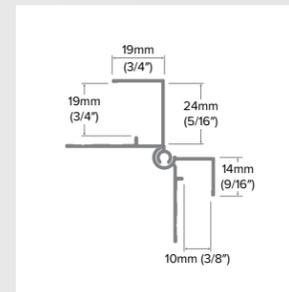

Length  
10'

Series  
5/16" to 3/4"

## Description

The Multi-Angle Outside Corner Transition is a revolutionary trim profile that allows you to almost seamlessly transition between the two siding depths available in the EasyTrim® fiber cement system. This trim can be installed to trim various desired angles from 105 to 160 degrees, replacing the time-intensive installation of 2 adjusted J trims.

Transition Trim

# Inside Corner Transition

Category  
Inside Corner

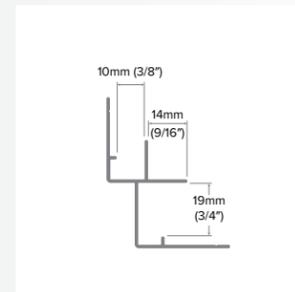

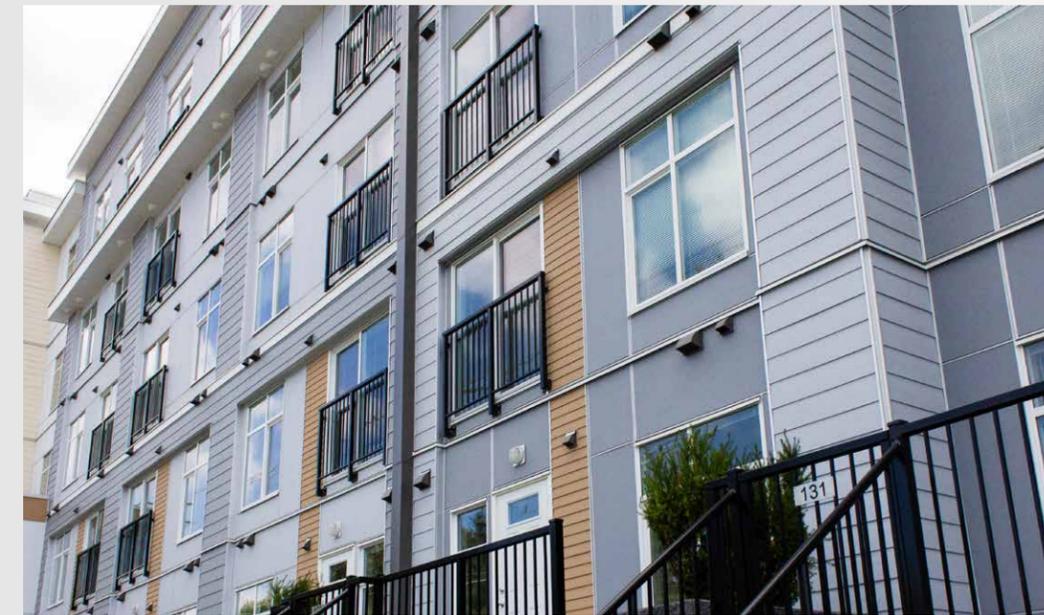

Length  
10'

Series  
5/16" to 3/4"

## Description

The Inside Corner Transition allows you to almost seamlessly transition between the two siding depths available in the EasyTrim® fiber cement system. This profile also provides the protection required on your fiber cement edges and a clean consistent straight line up your wall on all of your inside corners through our connecting 1/2" tabs extending out to both sides.

# Vertical Window Sill J

Category  
J Trim

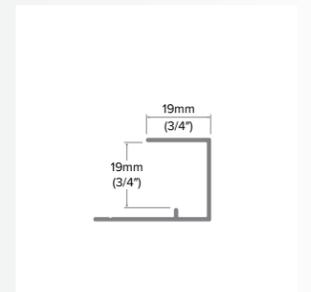

Length  
10'

Series  
3/4"

## Description

The Vertical Window Sill J is designed to cap the vertical ends of your windows and doors. It is also used when butting up against other building materials used outside of the EasyTrim® System. It features industry-leading 3/4" tabs to protect your fiber cement as well as our patented EZ.Bump® for full water management, and caulk-free installation.

# 2" Insulated Window

Category  
J Trim

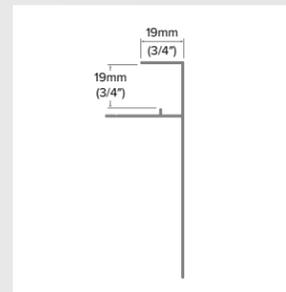

Length  
10'

Series  
3/4"

## Description

The 2" Insulated Window creates a rigid, straight, and true, abuse-resistant jamb with a 3/4" tab that covers and protects the vertical end of the planks. The extended leg helps conceal and protect insulation and rainscreen terminations.

# Perforated Vented Starter Strip

Category  
Strip

Length  
10'

Series  
Universal

## Description

The Perforated Vented Starter Strip keeps bugs out, allowing ventilation into the rainscreen cavity while saving labor and material costs. Our starter strips are based on a concept developed by siding installers to combine two important siding accessories – a lip edge for the starter course of siding and perforations to create a bug screen for rainscreen cavities.
