

# POWDER PERFECT™ SERIES

## THE NEXT LEVEL IN FINISH PERFORMANCE

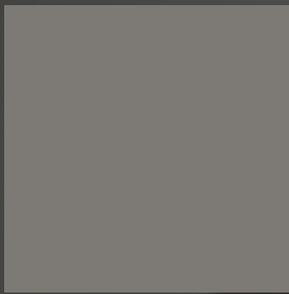

Powder Perfect™ is engineered for exterior trim that has to perform, not just look good on install day. Unlike conventional paint, the powder-coating process builds a thicker, fully cured finish that resists scratching, chipping, and fading during handling, installation, and long-term exposure to sun and weather. The result is a more durable, color-stable surface with consistent coverage across every profile—reducing on-site touch-ups and helping trims maintain a clean, architectural appearance over time. Latex paint remains a trusted option; Powder Perfect™ is chosen when durability, finish consistency, and long-term exterior performance matter more.

# FINISH OPTIONS

## Powder Perfect Series™

The EasyTrim Reveals® Powder Perfect™ Series features seven powder-coated finishes engineered for superior durability, color retention, and long-term performance. This best-in-class powder coating delivers a harder, more resilient finish than liquid paint, ensuring a premium look that stands up to the toughest conditions.

Aged Pewter

Cobble Stone

Iron Grey

Rich Espresso

Monterey Taupe

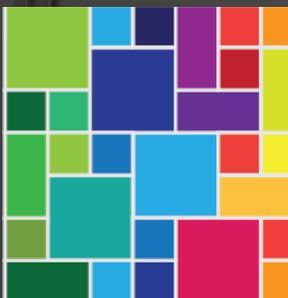

Pearl Grey

Arctic White

## ColorMatch® Program

The EasyTrim Reveals® Powder Perfect™ ColorMatch® program delivers virtually unlimited finish options using an architectural-grade powder-coating process. Any specified color can be precisely matched and consistently reproduced, giving architects and designers complete freedom to achieve their vision—while maintaining the durability, color stability, and long-term performance of a fully cured powder-coat finish.

All finishes shown are reproductions and may differ slightly from actual products. Product samples are available for color verification and approval.
