Leading Provider of Aluminum Cladding Solutions

Who We Are

ENGAGE
BUILDING PRODUCTS®

Engage Building Products is a North American leader in extruded aluminum exterior cladding – manufacturing innovative trim, plank, and panel systems that simplify installation, elevate design, and endure the test of time.

300+

Patents Filed & Granted

**Servicing
all of North
America**

4

Industry-Leading
Product Lines

Our Mission: To lead the evolution of exterior building products through innovation, speed, and customer-driven solutions.

Our Product Lines

ENGAGE
BUILDING PRODUCTS®

EasyTrim® Reveals

Precision aluminum trim profiles designed to integrate with fiber cement, vinyl, and wood cladding systems.

FastPlank® Systems

Complete aluminum plank cladding with patented Clip & Slide™ technology for fast, consistent installation.

QuickPanel® Systems

Complete ACM panel system delivering the route-and-return aesthetic at dramatically reduced cost and complexity.

Know Your Audience

Architects

FOCUS

Design intent, technical details, specifications, performance.

PITCH

Provide design freedom, technical resources, submittals, samples, and confidence that the product will perform as specified.

Installers

FOCUS

Ease of installation, productivity, reliability, reduced callbacks.

PITCH

Highlight installation efficiency, technical support, training, and systems that help crews work faster and with confidence.

Developers

FOCUS

Profitability, risk reduction, project timelines, asset value.

PITCH

Show how Engage products help create durable, marketable buildings while reducing long-term maintenance and ownership costs.

Builders

FOCUS

Schedule, coordination, budget, risk management.

PITCH

Demonstrate how Engage products simplify project execution, reduce installation challenges, and support successful project delivery.

Dealers

FOCUS

Product demand, sell-through, customer support, profitability, market growth, supply reliability, territory coverage.

PITCH

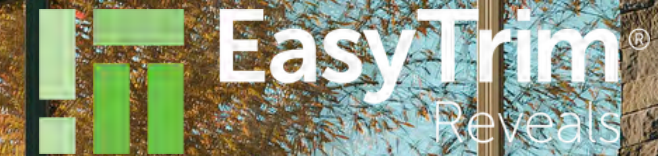

Emphasize strategic partnership, product support, marketing resources, and solutions that help drive sales.

Tailor your conversation to what matters most to the person in the room.

Advanced Aluminum Trim System

What is EasyTrim®?

EasyTrim Reveals® is a system of precision-extruded aluminum trim profiles designed to integrate seamlessly with third-party cladding from the leading cladding manufacturers in North America.

Complements products from leading siding manufacturers

Extends building life with durable 6063-T6 aluminum extrusions

2-Piece profiles snap together for faster installation and a clean finish

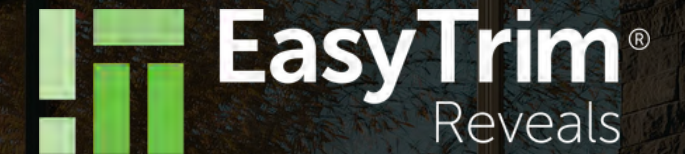

EZ.Slope™ sheds water off horizontal ledges while EZ.Bump™ channels drain moisture away from the wall

Ask: "What siding are you using? We have a system that integrates perfectly."

Why EasyTrim®?

Industry Leader

EasyTrim® is the #1 aluminum trim system in North America, trusted by thousands of installers and builders.

Complete Profile Systems

Profiles engineered for every major siding thickness – 5/16", 3/4", 7/16", 1", 1-1/4"

Faster Installation

Two-piece clip system and EZ.Lock™ snap-in caps dramatically cut trim installation time on site.

Superior Water Management

EZ.Slope™ 8° angle and EZ.Bump™ drainage channels actively shed water and debris from the facade.

ColorMatch™ Program

Match any specified color in paint or powder coat.

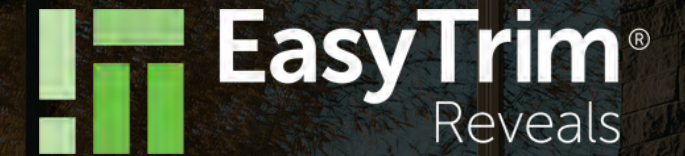

No Sharp Edges

Fit & Finish™ two-piece overlapping design eliminates exposed sharp edges, reducing liability.

Why it matters: EasyTrim® turns ordinary siding into a finished, architectural exterior.

Profile System Overview

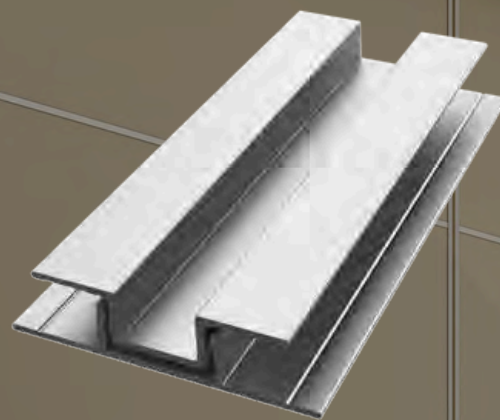

EasyTrim® profiles are organized into complete systems, developed to work in combination with fiber cement, engineered wood, and vinyl, while accommodating different sizes and thicknesses of material.

5/16" System

PANEL TRIMS

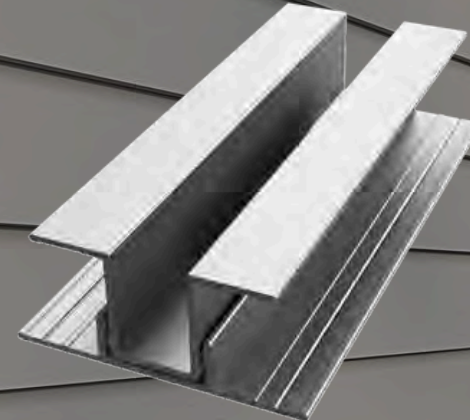

Designed for 5/16" panels.
Compatible with leading fiber cement manufacturers including James Hardie Board and more.

3/4" System

LAP TRIMS

Engineered for 3/4" lap siding.
Compatible with James Hardie Plank and Artisan, vinyl and more.

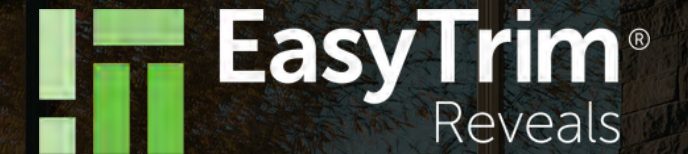

Specialty

7/16" · 1" · 1 1/4" TRIMS

Purpose-built profiles for specialty siding thicknesses from Nichiha, CeraClad, LP Smartside, and other manufacturers requiring non-standard dimensions.

5/16" Panel Trims

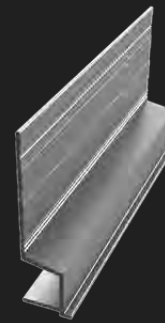

Engineered for 5/16" panels.
The most widely specified EasyTrim® system.

INNOVATIVE TRIMS

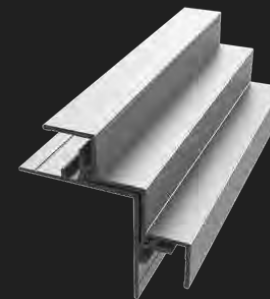

EZ 10

This profile is primarily used as a transition in soffit to fascia applications. It also features our patented EZ.Slope®.

EZ 12

A 2-Piece square outside corner designed to speed up installation.

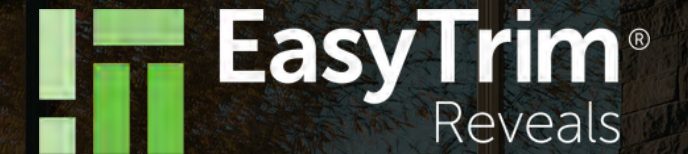

EZ 19

The backplate features a caulking channel ensuring a clean and tight fit to your window frames and doors.

Transition Trims

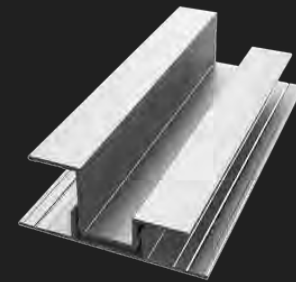

Designed for transitioning between 5/16" panel and 3/4" lap siding.

INNOVATIVE TRIMS

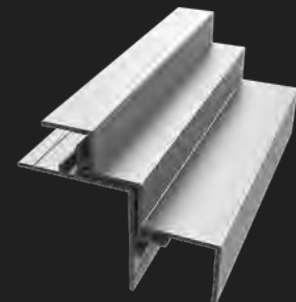

EZ 11

This reversible profile provides an effortless transition between 5/16" panel and 3/4" lap.

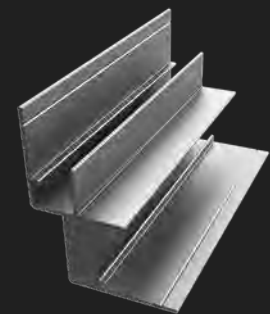

EZ 16

This reversible square outside corner provides an effortless transition between 5/16" panel and 3/4" lap.

EZ 17

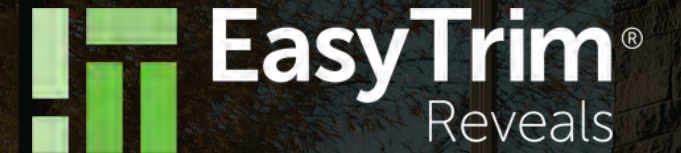

This reversible inside corner provides an effortless transition between 5/16" panel and 3/4" lap.

3/4" Lap Trims

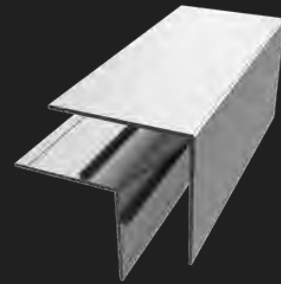

Designed for 3/4" lap siding.

INNOVATIVE TRIMS

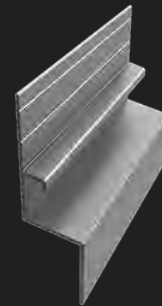

EZ 33

This outside corner provides a clean consistent square design to your corners and columns.

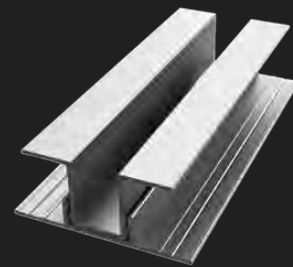

EZ 48

Provides the natural kickout required to start lap plank installation.

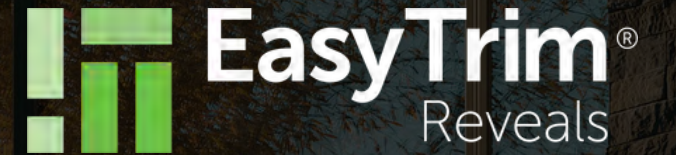

EZ 38

This profile removes the need for staggered butt joints. The tabs also protect the cut edges of your lap siding.

Specialty Profiles

Purpose-built systems for specialty cladding thicknesses.
When standard profiles won't cut it, EasyTrim® has the answer.

7/16"

SPECIALTY SYSTEM

Created for 7/16" engineered wood and composite siding. Compatible with LP Smartside.

1"

SPECIALTY SYSTEM

Designed for thicker panel products requiring a deeper trim channel including Nichiha's architectural wall panels.

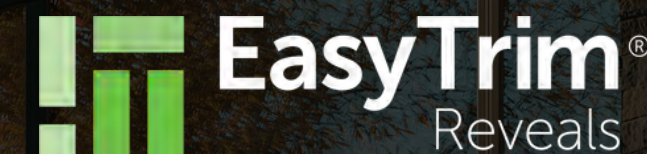

1 1/4"

SPECIALTY SYSTEM

The deepest specialty profile. Built for the thickest fiber cement and panel products on the market including CeraClad.

Two-piece overlapping trim profiles deliver a clean architectural finish and eliminate the risks of exposed sharp aluminum edges.

No Exposed Sharp Edges

The overlapping two-piece design fully conceals all cut aluminum edges – reducing injury risk for installers and liability for builders.

Clean, Consistent Appearance

The top cap conceals inconsistent panel edges ensuring a uniform, finished look across the entire facade.

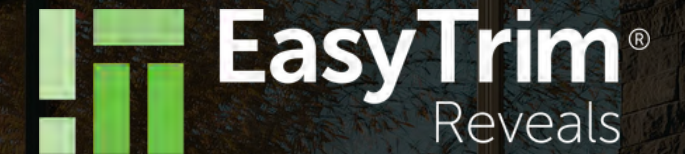

Faster Install

The backplate is installed first and the cap snapped on later – allowing siding installation to proceed before the final trim detail is completed.

Water Management

EZ.Slope™

8° Slope – Sheds Water and Grime

All horizontal ledges are engineered with an 8-degree slope. Water, grime, and debris cannot pool – they are shed directly away from the building surface.

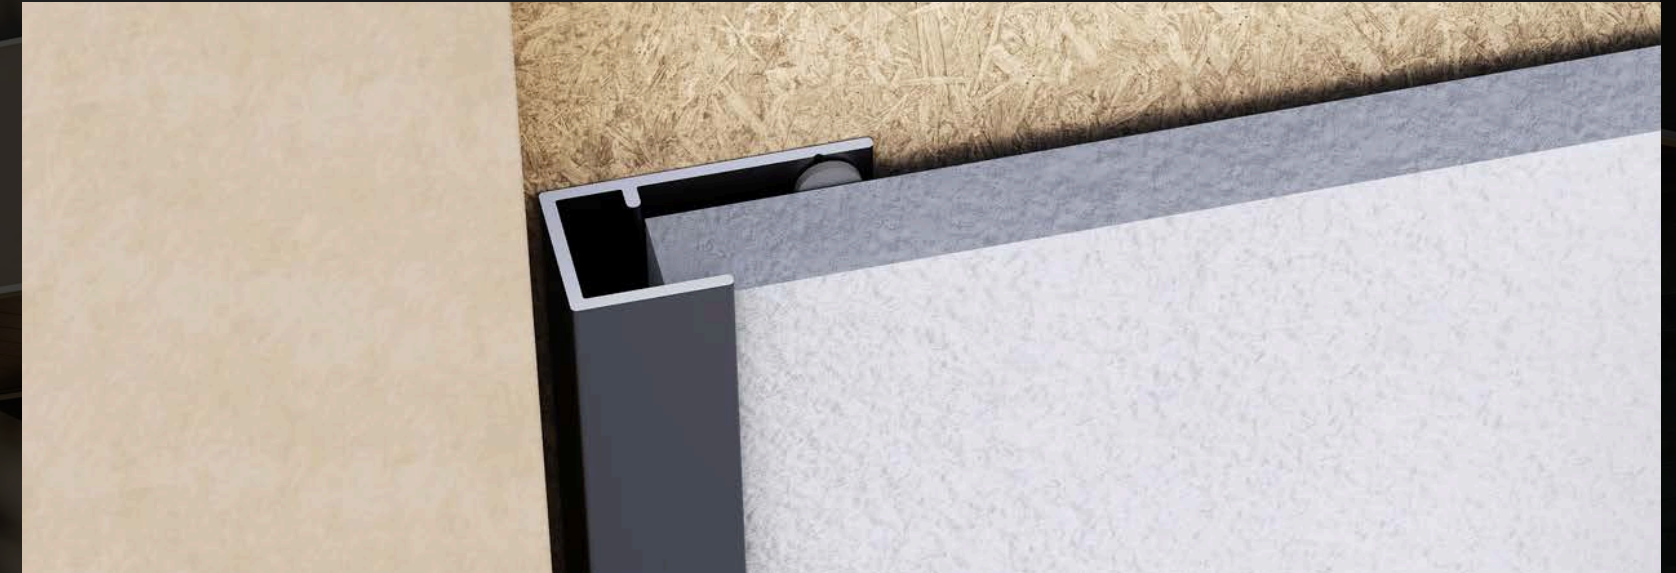

Why it matters: Stagnant water is the #1 cause of exterior deterioration. EZ.Slope™ eliminates it by design.

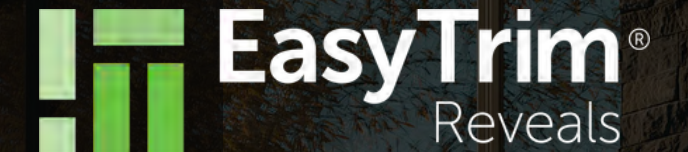

EZ.Bump™

Drainage Channels Built Into Every Profile

Intelligently designed channels and bumps guide water away from the wall assembly and towards drainage – actively protecting the building envelope under heavy rain.

Why it matters: Active drainage extends the life of the building exterior and reduces maintenance costs.

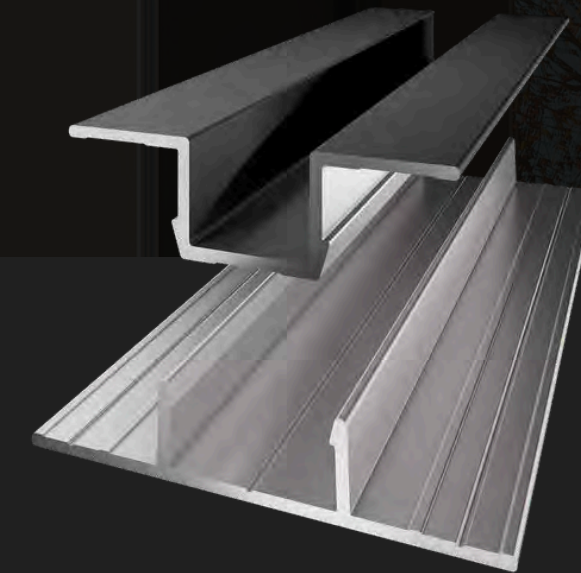

Simplified installation from start to finish.

01

Install the Backplate

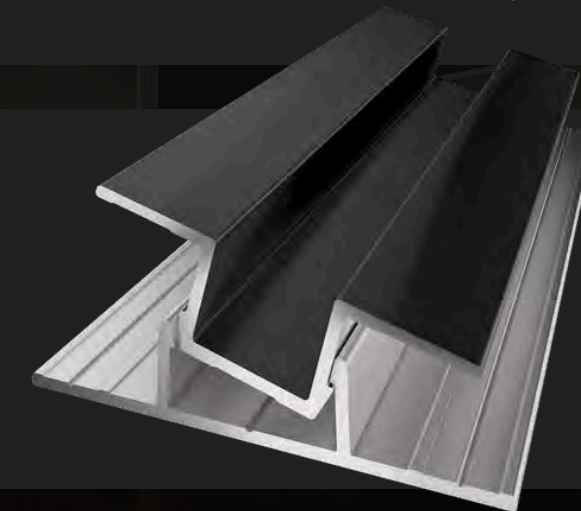

Fasten the EasyTrim® backplate to the wall. Open tab-free areas allow siding to be slipped in without obstruction.

02

Install Your Siding

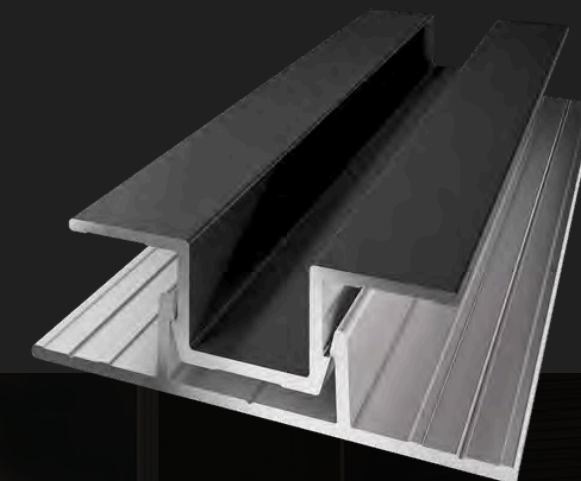

Install plank, lap, or panel cladding directly overlapping the backplates. No special tools or techniques required.

03

Snap On the Top Cap

The snap-in top cap clicks securely into place, locking siding edges and delivering the finished trim appearance.

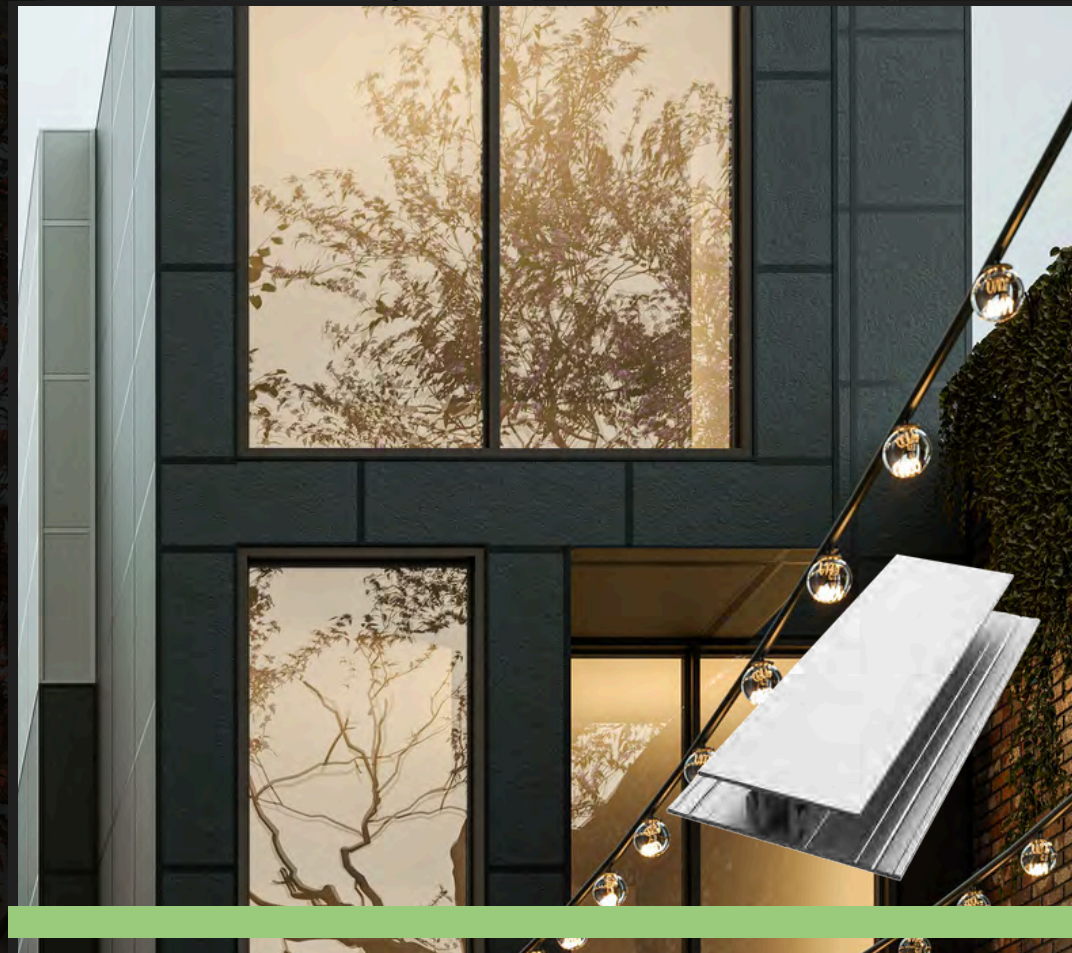

No specialized tools. No complex sequencing. Faster installations, fewer callbacks.

Three Design Looks

REVEALS

Classic. Maximum shadow play.

STREAMLINE

Bold, reveal-free expression.

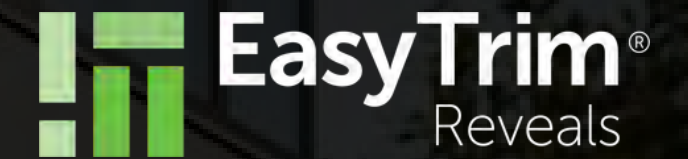

MONO

Minimalist, reveal-free expression.

EASYTRIM® DESIGN LOOK

REVEALS

The Foundation Look

Creates clean, sharp, and consistent shadow lines across the façade. Inspires a calm, composed sense of serenity.

Classic, most popular EasyTrim® configuration

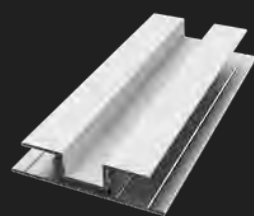

Shadow lines create strong architectural presence

Consistent reveal depth across the full façade

Performs across residential, multi-family & commercial architecture

KEY PROFILE

EZ 07

The defining reveal profile — creates the signature shadow line depth that defines this look.

EASYTRIM® DESIGN LOOK

STREAMLINE

Bold Shadowless Look

Removes shadow lines while maintaining a standard tab width. Clean geometry with added engagement, a bold design choice.

Reveal-free architectural expression

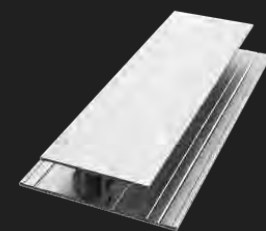

Retains standard tab width for structural familiarity

Strong, decisive architectural statement

Popular in contemporary commercial applications

KEY PROFILE

EZ 23

The defining reveal profile — creates the bold edges that define this look.

EASYTRIM® DESIGN LOOK

MONO

Elegant Minimalist Look

Removes shadow lines and reduces the tab to half width, creating a smooth, near-seamless monolithic façade appearance.

Eliminates reveal shadow lines

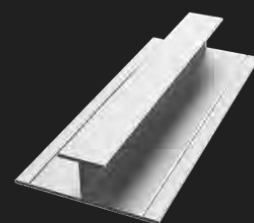

Half-width tab for an ultra-refined, elegant detail

Premium aesthetic for high-end builds

Architects love its quiet, disciplined geometry

KEY PROFILE

EZ 25

Half-tab flush profile – the defining element of the ultra-minimal Mono look.

Warranty

15-year limited warranty on all extruded aluminum trim profiles

Compliant with all major siding manufacturers' warranties

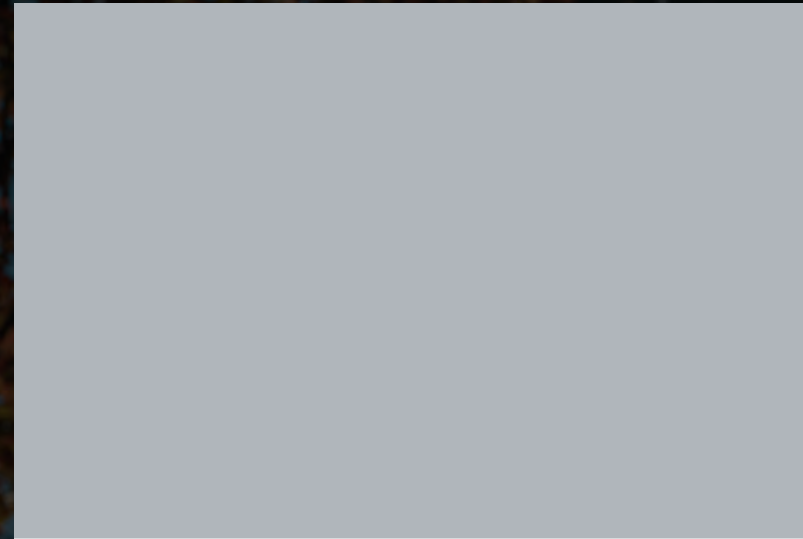

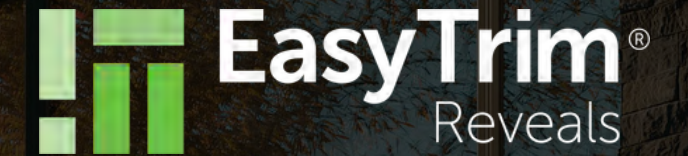

Primed profiles include a one-year on-site paint application window

Warranty documents and care guides available at engagebp.com/resources

Complete Aluminum Plank Siding System

What is FastPlank®?

FastPlank® is a complete extruded aluminum plank cladding system featuring a patented two-piece Clip & Slide™ attachment method for fast, consistent, and precise installation.

- ✓ Low maintenance. Will not rot, warp, crack, or peel
- ✓ Integrated rainscreen system, no need for strapping or furring
- ✓ PowderPerfect™ finish, durable and fade-resistant
- ✓ Available in natural woodgrain and solid color finishes
- ✓ For single-family, multi-family, commercial & institutional

Ask: "Looking for a wood look without the wood maintenance? FastPlank® is the answer."

Why FastPlank®?

Clip & Slide™ Technology

Patented Clip & Slide™ system for faster installation. Each plank can expand and contract independantly, eliminating oil canning and buckling.

Rainscreen System

FastPlank® is a AAMA 508-certified pressure-equalized rainscreen system. Intelligent design channels water away from the building envelope.

Hail / Impact Resistant

Very Severe Hail (VSH) rating earned. Aluminum planks showed no cracking or splitting when struck by 2" ice balls at over 150 fps.

Low Maintenance

Aluminum never rots, warps, cracks, or peels. No painting, staining, or sealing. Ever.

Salt Spray Resistant

FastPlank® is anti-corrosive and rust-resistant. In compliance with ASTM B117-73 Salt Spray (Fog) testing, FastPlank is certified AAMA 1402-9.

PowderPerfect™ Finish

Industry-leading powder coat finish. Consistent, fade-resistant color available in woodgrain or solid. ColorMatch™ available.

Why it matters: FastPlank® is your ticket to creative freedom without compromise.

Clip & Slide™ Technology

Install faster. No expert knowledge. No specialized equipment.

01

Place the Plank

Position the FastPlank® plank on the starter track or the previous plank.

02

Snap on the Clips

Snap FastPlank® clips onto the plank every 32 inches.

03

Secure to the Wall

Drive fasteners through the clips into wall.

Install more in less time. FastPlank® covers 8 sq. ft. with a single plank and just 8 screws, making it easy for any crew to accelerate installation and reduce labor costs.

QuickPanel[®]
Systems

Complete ACM Panel Cladding System

What is QuickPanel®?

QuickPanel® is a complete ACM panel cladding system, paired with Engage's proprietary extruded aluminum trim system, delivering the architectural look of route-and-return ACM panels without the cost or complexity.

- ✓ Faster turnaround from start to finish. Panels cut to size on-site, no CNC machine needed
- ✓ Integrated pressure-equalized rainscreen – AAMA 508-21 certified
- ✓ Reduced labor costs and no specialized equipment, any qualified crew can execute the install
- ✓ 4mm FR ACM Panel and 3mm Solid Aluminum Plate
- ✓ Concealed fastening delivers a cleaner finish

Ask: "Have you ever priced a traditional route-and-return ACM system? QuickPanel® delivers the same look for significantly less."

Why QuickPanel®?

Route-and-Return Aesthetic

Delivers the premium flat-panel look without routing machines, waste, or extended lead times.

Reduced Cost

Significant savings vs. traditional ACM. No specialized fabrication. Panels arrive cut-to-size, ready to install.

Faster Installation

Two piece trim system. Backplates go up, panels drop in, top caps snap into place. Any commercial installer can execute it.

Rainscreen Performance

Integrated pressure-equalized rainscreen with drainage, ventilation, and circulation – AAMA 508-21 certified.

Concealed Fastening

All fasteners hidden behind trim top caps. Clean panel faces with no exposed hardware.

PVDF Kynar Finish

Factory-applied PVDF Kynar meets AAMA 2605 – the gold standard for exterior aluminum finishes.

Why it matters: QuickPanel® provides the look of route-and-return without the need for a specialized equipment, opening up metal panel scope work for any installer.

Why QuickPanel®?

Category	Traditional Route-and-Return	QuickPanel®
Fabrication	Requires CNC machine	✓ Panels can be cut-to-size on site
Installation	Complex sequencing, specialized trades	✓ Any commercial crew can easily learn
Cost	Premium cost, fabrication + installation labor	✓ Significant cost reduction – same look
Lead Times	Extended lead, custom shop fabrication	✓ Faster turnaround, simpler supply chain
Fasteners	Exposed or complex concealment	✓ Fully concealed fasteners
Rainscreen	Often requires separate assembly	✓ Integrated pressure-equalized

Muskoka Bay Resort

Complexity at a Cost Savings

The design called for curved wall sections and mirrored metallic panels; features that would traditionally require an expensive route-and-return panel system.

QuickPanel® made the project's curved and mirrored design possible, delivering a premium route-and-return aesthetic without the fabrication complexity or associated labour and material costs.

Concealed Fastening System

Stiffener backplate fastens to framing – fully hidden behind panels

Top cap snaps on, locking panels in place so no fasteners are exposed

Clean panel faces maintain architectural intent throughout the facade

EPDM gaskets on fasteners prevent moisture ingress at penetrations

6063-T6 aluminum stiffeners and trims – lightweight and high strength

Installation Advantages

01

Prepare the Wall

Install air & water barrier (AWB) per local building codes. Attach the Perforated Starter Flashing above the cladding start point. Confirm grid line layout from project drawings.

02

Install Back Plates

Mount corner, termination, horizontal, and vertical backplates onto the wall. Fasten 16" on centre using the EZ.Line® guide.

03

Set ACM Panels Into Back Plates

Cut panels short on each side for expansion. Peel back protective film around perimeter. Set panels using suction cups, and clip temporarily with QuickClips™.

04

Snap Top Caps Into Place

Set the top caps (Reveal or Absolute Series) into the back plates, then use the HammerBlock™ and deadblow mallet to snap it fully into place. Remove protective film.

Why it matters: No CNC? No problem. Any qualified intallation crew can install QuickPanel®; faster, cleaner, and with fewer callbacks.

QUICKPANEL® DESIGN LOOK

REVEALS

The Foundation Look

Creates clean, sharp, and consistent shadow lines across the façade. Inspires a calm, composed sense of serenity.

Classic, most popular QuickPanel® system

Shadow lines create strong architectural presence

Consistent reveal depth across the full façade

Excels across high-rise residential, multi-family, and commercial architecture.

STREAMLINE

Bold, Monolithic Design

Streamline removes reveal lines to create a smooth, uninterrupted façade with clean geometry and strong visual presence. The result is a bold architectural expression that emphasizes form, material, and scale.

- ✓ Reveal-free aesthetic
- ✓ Creates a continuous façade appearance
- ✓ Emphasizes clean geometry and form
- ✓ Popular in commercial and high-rise applications

Warranty

30-year product warranty on 4mm ACM panels

20-year product warranty on 3mm solid aluminum plates

Profiles are warranted not to split, crack, peel, blister, flake, rust, or be subject to abnormal weathering

Warranty documents and care guides available at engagebp.com/resources

Architectural-Grade Finishes

Alfrex® 4mm FR ACM panels and 3mm solid aluminum plate are coil coated using 70% Kynar 500® / Hylar 5000® PVDF fluoropolymer resin technology, delivering exceptional flexibility, film adhesion, and long-term resistance to humidity, impact, salt spray, pollution, and abrasion.

We also offer Vivid Solid finishes which utilize advanced PVDF, FEVE, or HDP resin paint systems.

These architectural-grade finishes meet industry performance standard AAMA 2605, and our 6063-T6 extruded aluminum trims are Kynar finished to match.

All standard colors are available on 4mm FR ACM panels, while select colors are available in 3mm solid aluminum plate.

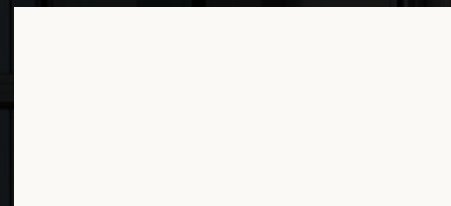

Color & Finish Options

PVDF Kynar® Finish – AAMA 2605

Factory-applied PVDF Kynar coating resists UV degradation, chalking, and fading. Backed by AAMA 2605 for superior long-term color retention. Backed by a 30-Year Finish Warranty.

The Engage Difference

ENGAGE
BUILDING PRODUCTS®

300+ Patents

Innovation isn't a talking point – it's legally protected. Over 300 patents filed and granted globally reflect a relentless commitment to solving real installation and performance challenges.

Large Sales Force

Local representatives in every major North American market – never more than a call away from hands-on, knowledgeable support.

Engineering-First Approach

Every product starts as a problem to solve – for installers, architects, or builders. Engage products are tested, certified, and engineered to outperform.

Your Success Is Ours

From pre-construction estimation to job site training, Engage partners are never left to figure it out alone. When you win, we win.

Common Objections & Responses

"Aluminum is too expensive."

The installed cost is comparable – or lower – when you factor in reduced labor time and zero maintenance over the building's lifetime. Aluminum doesn't rot, peel, or need repainting.

"We've always used wood / vinyl / fiber cement."

Those materials require ongoing maintenance and have real performance limitations. Aluminum eliminates those costs and callbacks. The first project often converts clients permanently.

"I've never heard of Engage."

Engage is the #1 extruded aluminum siding manufacturer in North America with 300+ patents and a presence in every major market. Your competitors likely already know us.

"Your lead times are too long."

Stocked profiles and finishes ship quickly. For ColorMatch™ or specialty orders, our team gives you an accurate lead time upfront – no surprises.

"We already have a supplier."

Ready to order? We'd love to show you what you might be leaving on the table. Our estimating team will quote your next project for free – let the numbers do the talking.

Next Steps

Ready to bring Engage into your next project? Here's how to get started.

Project Consultation

Need design support, spec language, or product selection guidance? Connect with your local rep for a no-pressure consultation.

Submit for Estimation

Ready to order? Send project drawings to your local rep. Our team provides free, detailed take-offs.

Schedule Training

Book on-site or virtual training for your installation crew. Engage reps walk through the system step-by-step.

Your Engage representative is your partner from day one. We're here to make every project easier.
