WHAT IS FASTPLANK®?

FastPlank® is a complete collection of engineered aluminum cladding systems, built around the proprietary Clip & Slide™ attachment.

Designed for fast installation and broad design flexibility, from clean contemporary lines to wood-inspired traditional looks, across residential, commercial, and multi-family projects.

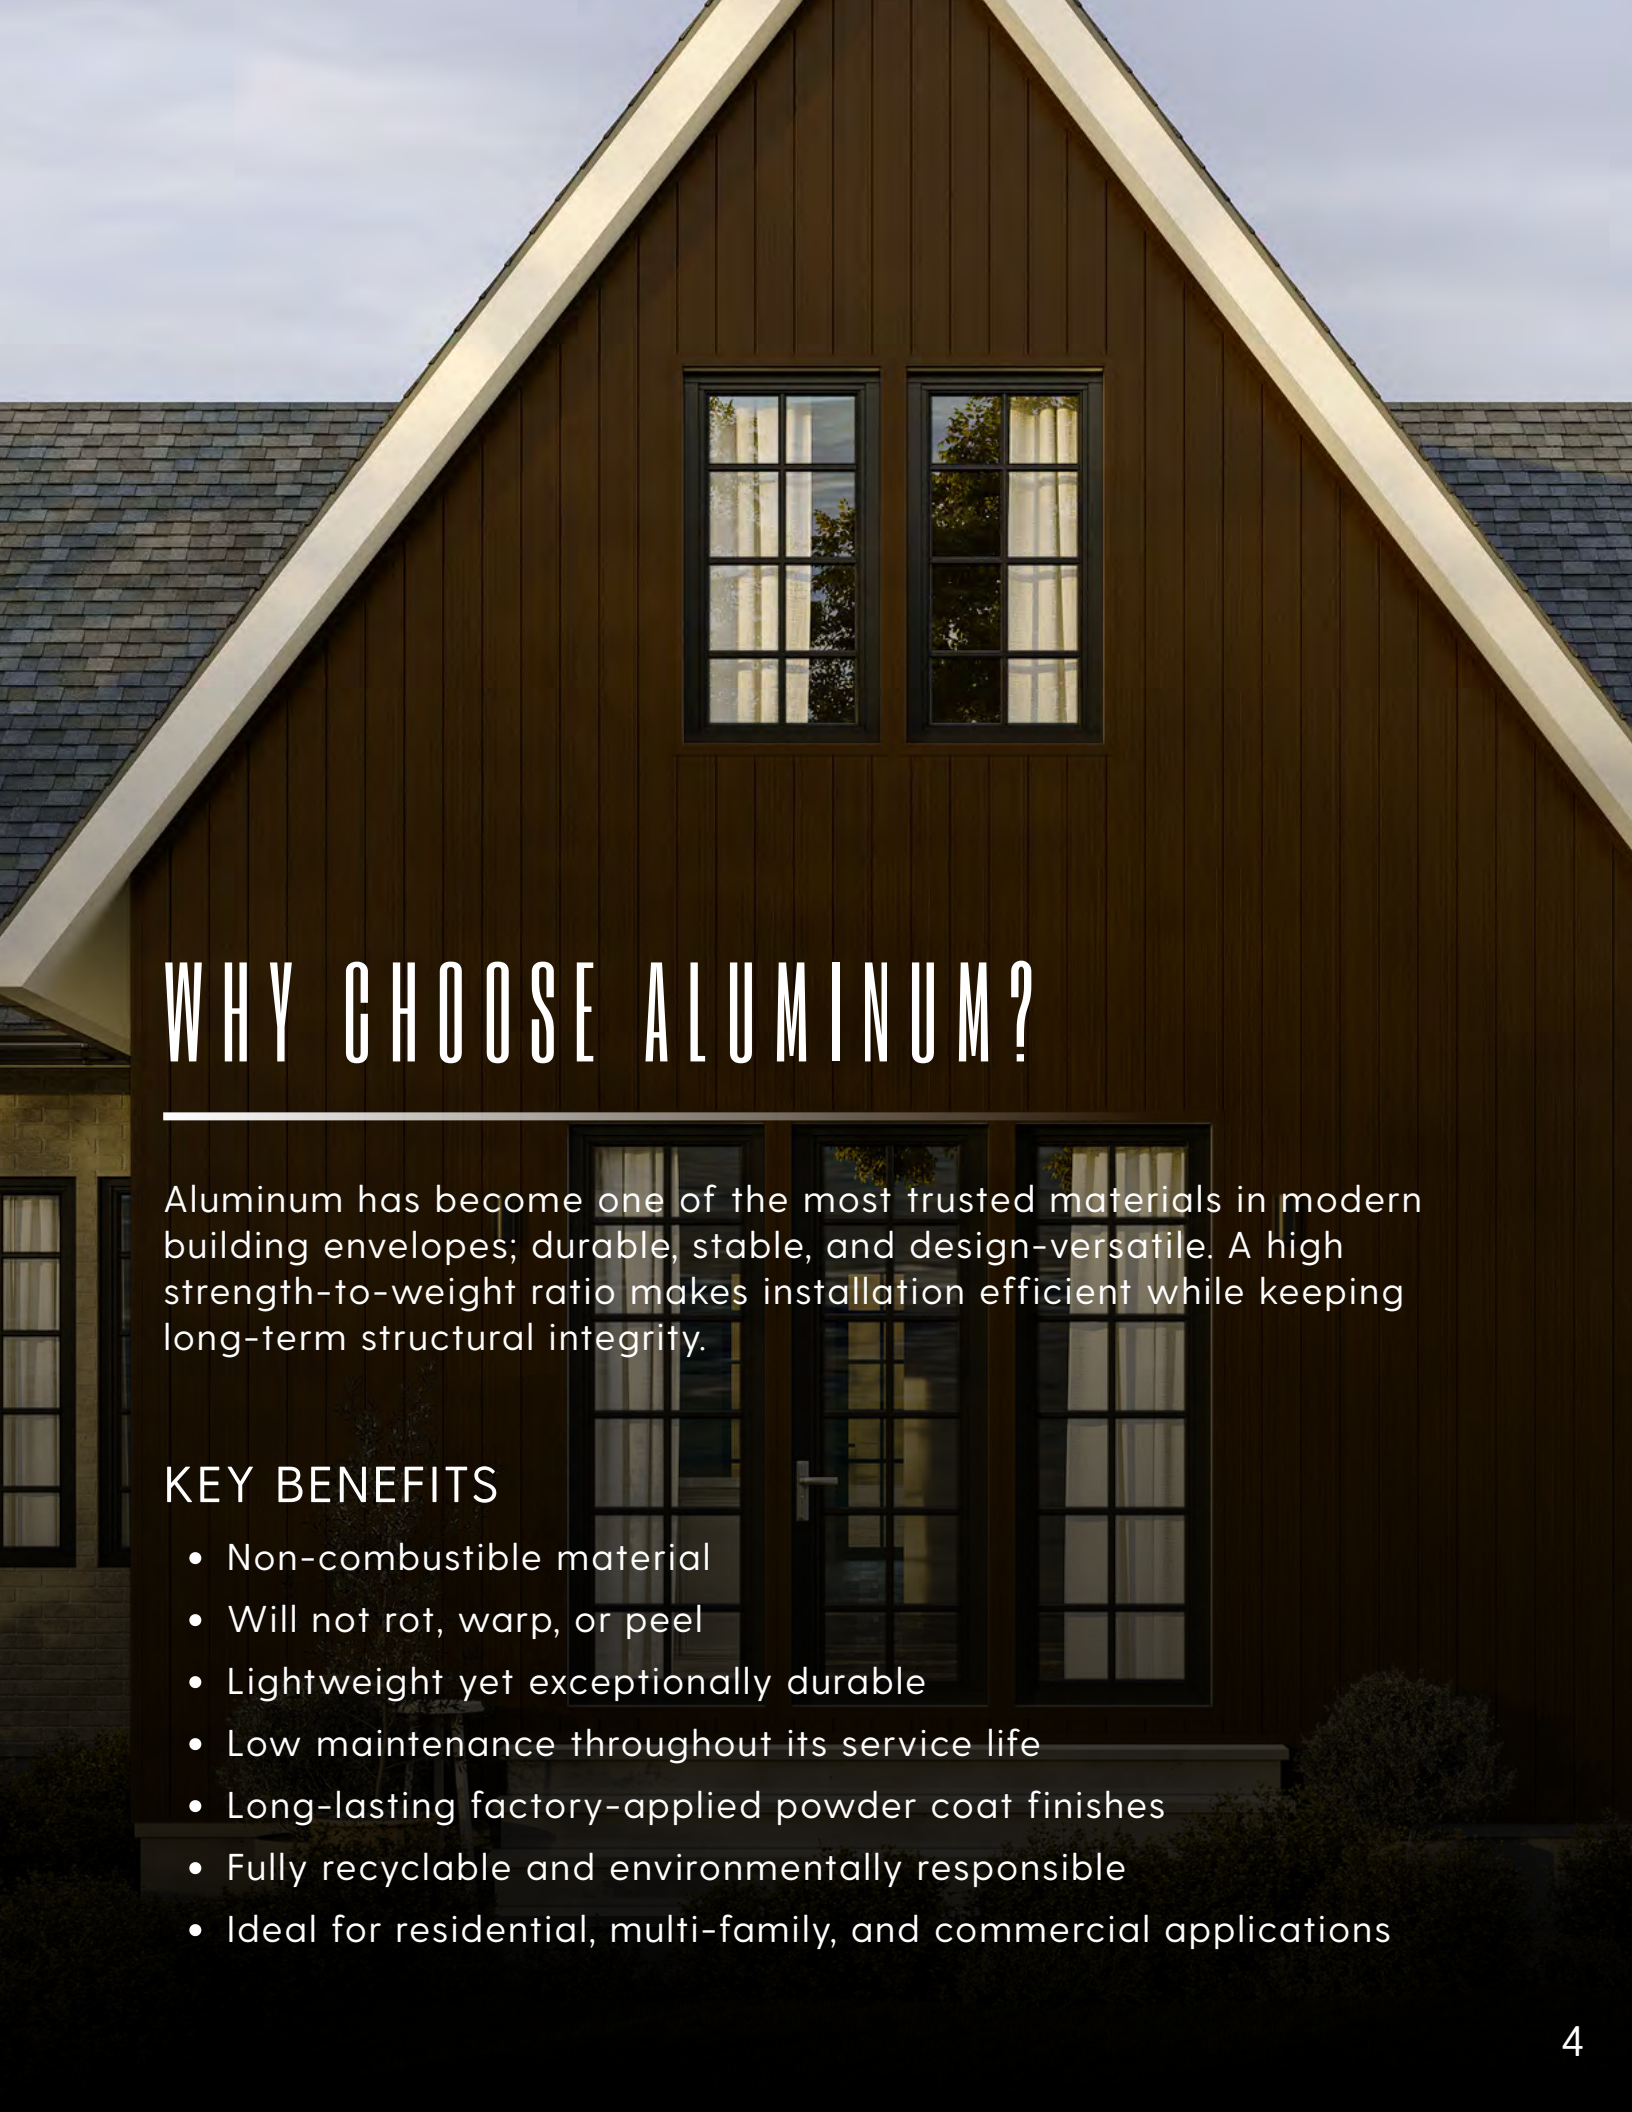

THE FASTPLANK® ADVANTAGE

The warmth and character of wood. The durability and consistency of extruded aluminum.

FastPlank® is a complete rainscreen system engineered for clean lines, efficient installation, and long-term reliability, without the maintenance concerns of wood, fiber cement, or composite.

WHY CHOOSE ALUMINUM?

Aluminum has become one of the most trusted materials in modern building envelopes; durable, stable, and design-versatile. A high strength-to-weight ratio makes installation efficient while keeping long-term structural integrity.

KEY BENEFITS

- Non-combustible material
- Will not rot, warp, or peel
- Lightweight yet exceptionally durable
- Low maintenance throughout its service life
- Long-lasting factory-applied powder coat finishes
- Fully recyclable and environmentally responsible
- Ideal for residential, multi-family, and commercial applications

ENGINEERED FOR EXTREMES

NON-COMBUSTIBLE

Won't ignite or fuel a fire. Approved for California's strictest wildfire zones.

VSH

VERY SEVERE HAIL RATING

Tested with 2" ice balls at 150+ fps. Zero cracking, zero splitting.

UV & FADE RESISTANT

PowderPerfect™ Finish holds its color against harsh sun. Backed by a 20-year finish warranty.

WIND LOAD TESTED

Multi-storey structural wind load testing ensures FastPlank® can withstand intense storms.

SALT SPRAY CERTIFIED

Anti-corrosive and rust-resistant. Coastal ready.

BUILT FOR THE FUTURE

With aluminum at its core and architectural-grade powder coating as its shield, FastPlank® is engineered to transcend time and trend.

INTEGRATED RAINSCREEN

AAMA 508-certified, pressure-equalized. A 3/8" air cavity channels water away and exceeds code rainscreen requirements.

SUSTAINABLE BY DESIGN

100% recyclable aluminum, finished with low-VOC, near-zero-waste finish.

FUTURE-PROOF AESTHETICS

Reduces maintenance costs and preserves architectural integrity over the life of the building.

SIMPLE INSTALLATION

Installs quickly, no specialized equipment or expert knowledge required. The patented Clip & Slide™ attachment snaps together for faster, lower-cost installs.

Step 1: Place the Plank

Step 2: Snap on the Clips

Step 3: Secure to the Wall

One plank covers 8 sq. ft. with just 8 screws. Easy for any crew to install fast and cut labor costs.

A LEGACY REINVENTED

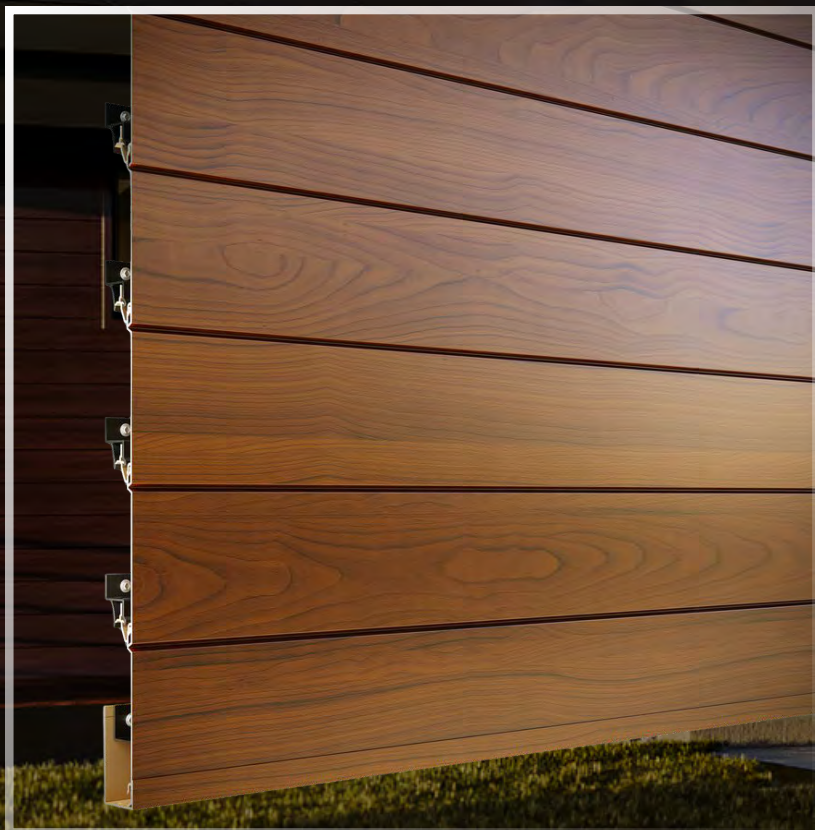

There are designs that define an era, and those that transcend it. Rooted in the enduring cladding traditions of early North American architecture, V-Notch™ has been meticulously re-engineered to bring architectural depth, disciplined geometry, and lasting integrity to modern multifamily design.

V-NOTCH™

Category
Plank

Length
16'

Once the hallmark of classic wood architecture, V-Notch™ is reborn in precision-engineered aluminum. Its tongue-and-groove design creates perfect reverse shadow lines, a façade of lasting symmetry.

Material	6063-T6 Extruded Aluminum
Thickness	15 gauge (0.050 in / 1.27 mm nominal)
Finish	AAMA 2604 or AAMA 2605 compliant coating

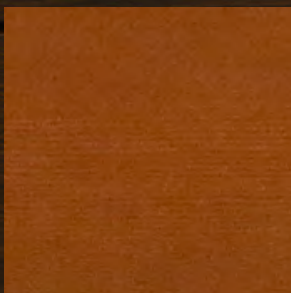

Beneath its timeless profile, a built-in rainscreen cavity delivers moisture management. Beautifully simple, meticulously engineered.

BEAUTY IN EVERY DETAIL

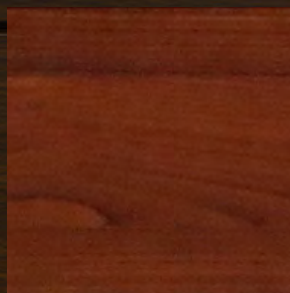

STOCK WOODGRAINS

Light Cherry

Dark Fir

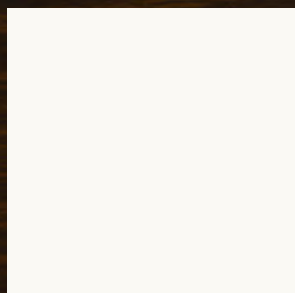

Dark Cherry

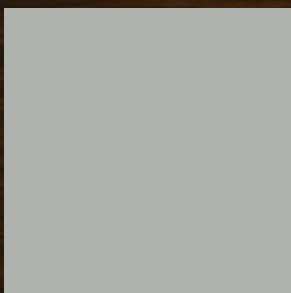

Dark Walnut

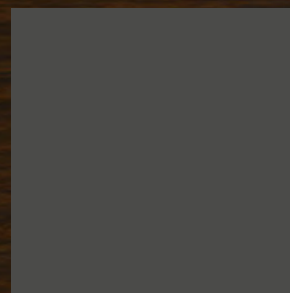

STOCK SOLIDS

Bone White

Cadet Grey

Charcoal

Classic Black

Custom solid colors with ColorMatch® (additional lead times apply)

All finishes shown are reproductions and may differ slightly from actual products. Product samples are available for color verification and approval.

All FastPlank® products come with 50-year Product warranty and 20-year Finish warranty

SPECIAL ORDER WOODGRAINS*

Western White Maple

Arctic White Oak

Belgium Pear

WHY CHOOSE ENGAGE?

Engage understands the scale and detail required in multifamily and residential development. Our in-house install support, estimating, and design teams collaborate directly with your project managers to ensure precision from concept through installation.

DEDICATED TECHNICAL SUPPORT

Full-system design guidance, complimentary take-offs, dedicated on-site install support, and performance data.

INSTALLATION TRAINING

On-site and virtual training for all three product systems. For first-time users to experienced crews.

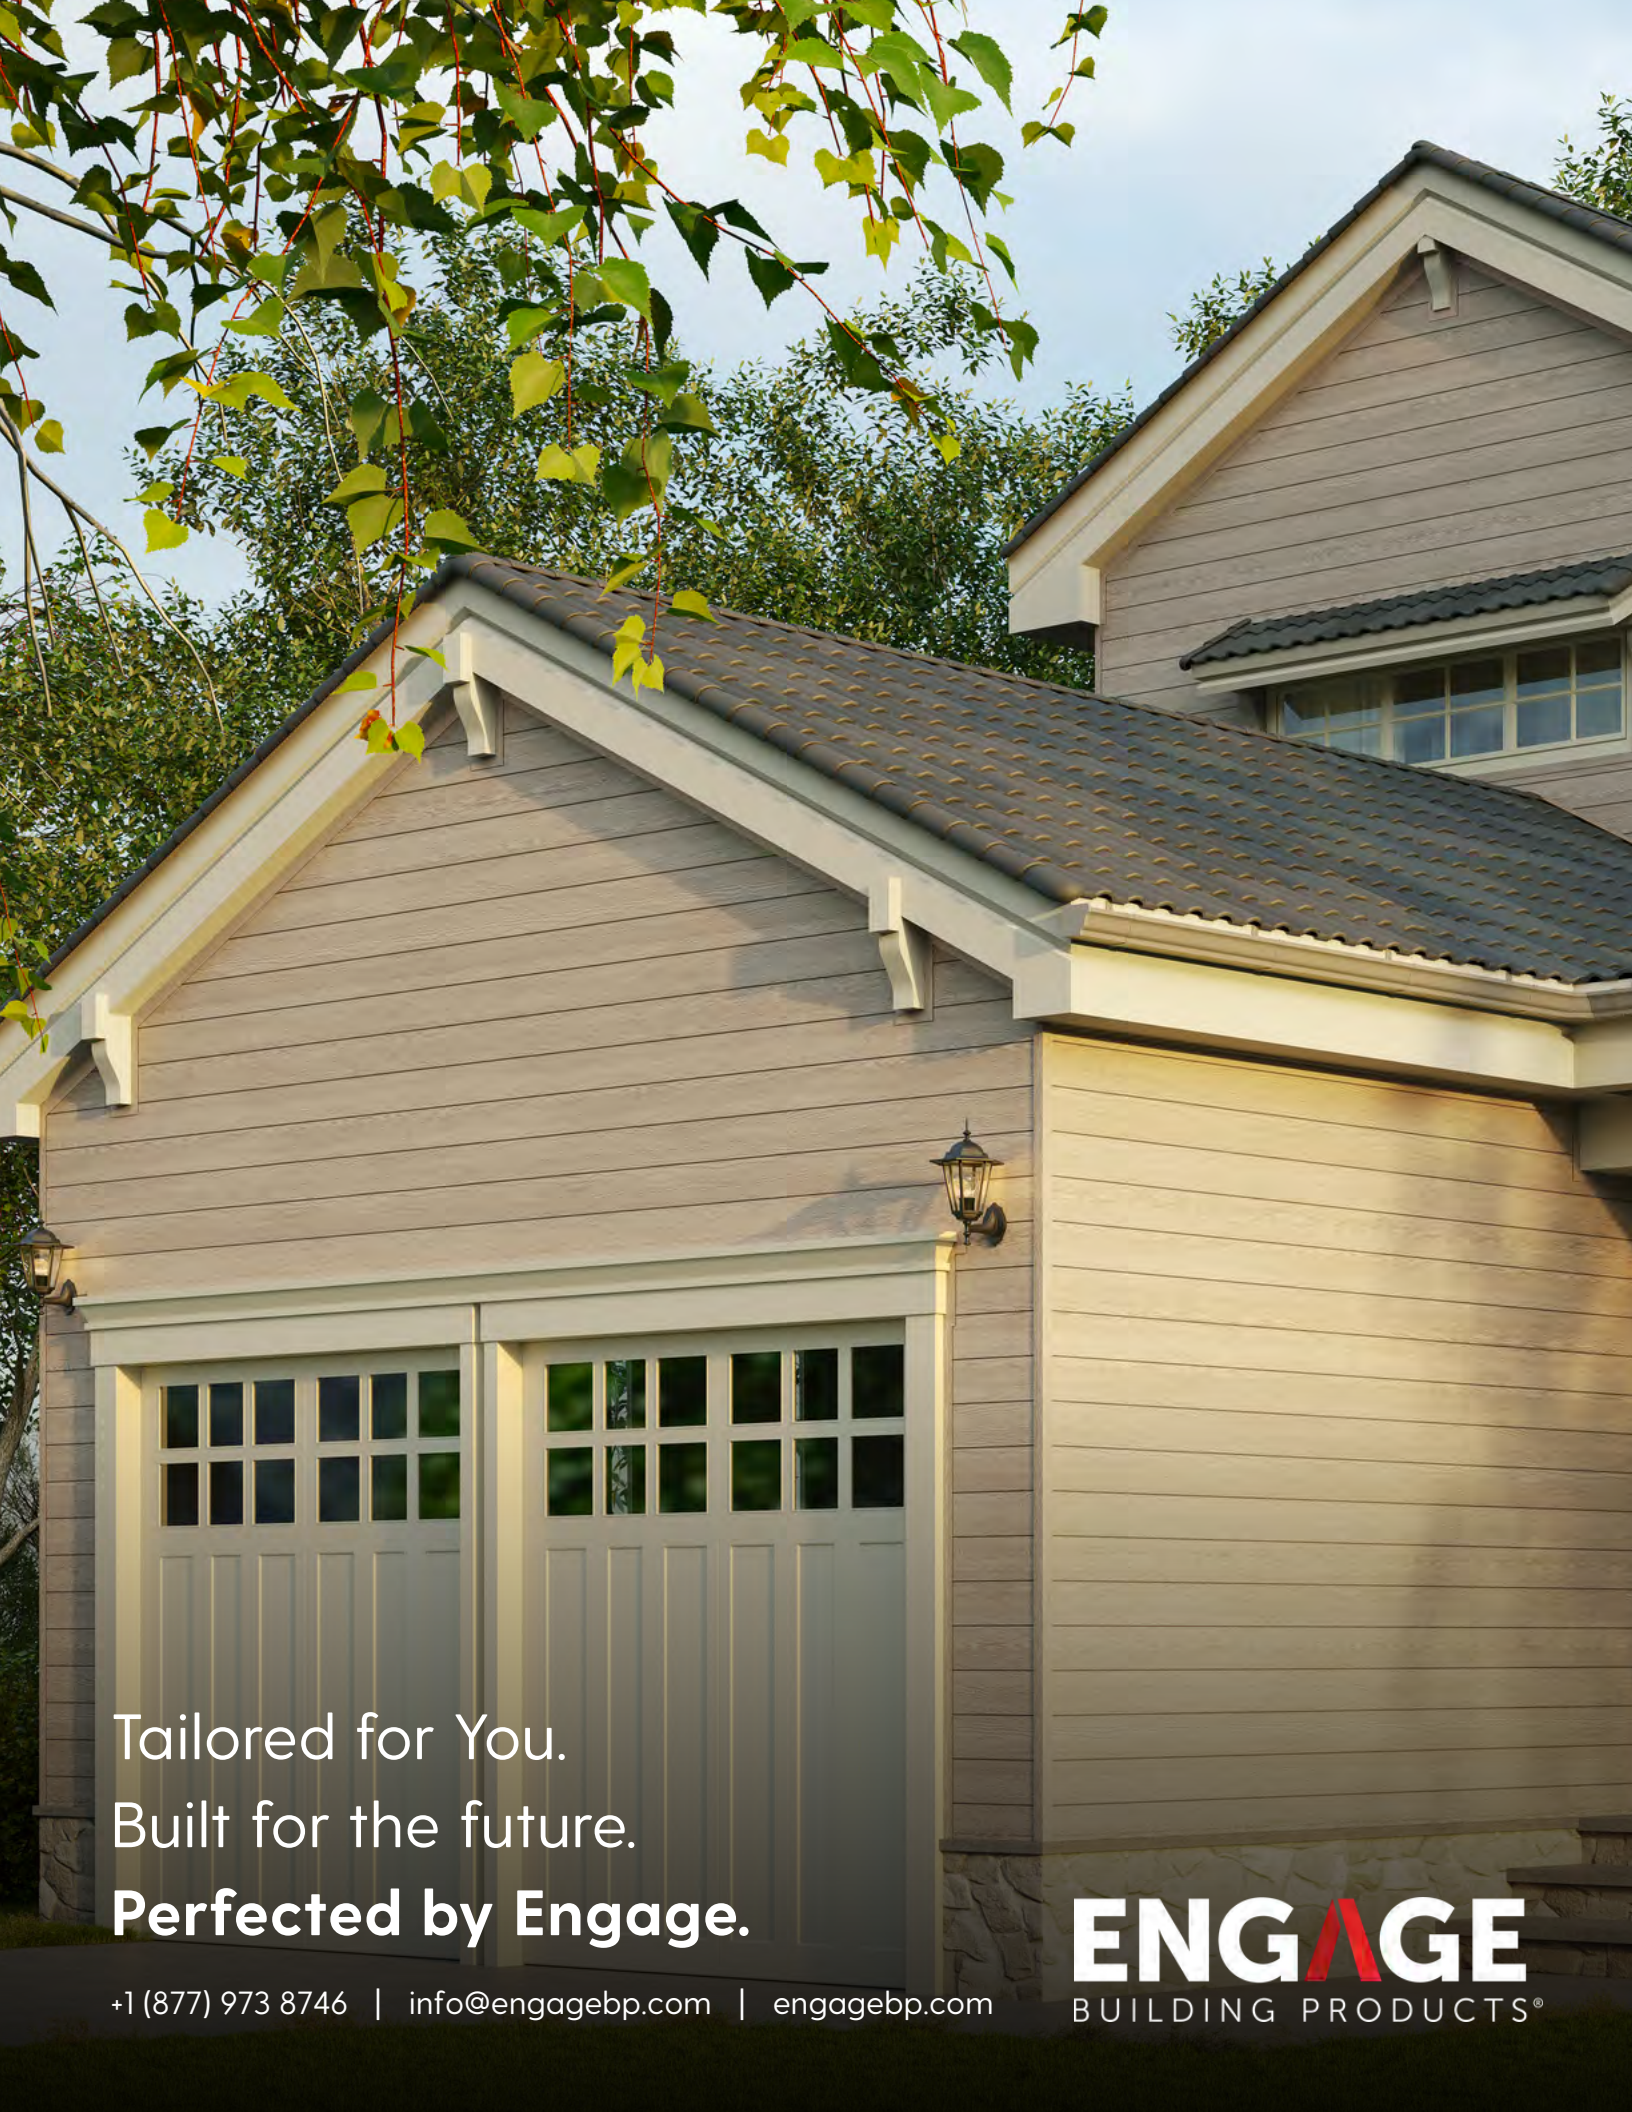

RELIABLE SUPPLY CHAIN

North American manufacturing ensures consistency and lead-time control.

PROVEN EXECUTION

Thousands of successful installs across North American residential and commercial markets.

Tailored for You.
Built for the future.
Perfected by Engage.
