Easy Trim®
Elegance
Quiet design. Powerful performance.

The Opportunity

Architecture has evolved.

Modern façades demand:

- Sharper lines
- Deeper shadow definition
- Cleaner water management
- Faster installation
- Long-term durability

Most trim systems still rely on bulky profiles, heavy caulking, and reactive moisture control.

EasyTrim Elegance changes that.

The Next Generation of EasyTrim

EasyTrim Elegance builds on the trusted engineering of the original panel and lap systems and refines it with:

- Precision slimline profiles
- Deeper architectural reveals
- Integrated drainage pathways
- Refined minimalist detailing

Designed for today's standards.
Built to outlast tomorrow's trends.

EasyTrim® Elegance

What's New in Elegance

Sharper Transitions
Slimline profiles create cleaner visual frames.

Deeper Reveals
Bolder shadow lines that give elevation clarity.

Integrated Drainage
Water is guided away from panel edges, not trapped behind them.

Minimalist Discipline
A refined aesthetic that works in both modern and timeless design.

EasyTrim® Elegance

EasyTrim Reveals®

EasyTrim Elegance

The result: controlled geometry, intentional shadow, durable performance.

The Two-Piece Advantage

EasyTrim® Elegance

FIT & FINISH™

High-efficiency two-piece assemblies ensure maximum edge protection.

Slimline tabs are cleverly designed to hide ugly field cuts.

Benefits:

- Greater alignment control
- Stronger long-term performance

The Two-Piece Advantage

EasyTrim® Elegance

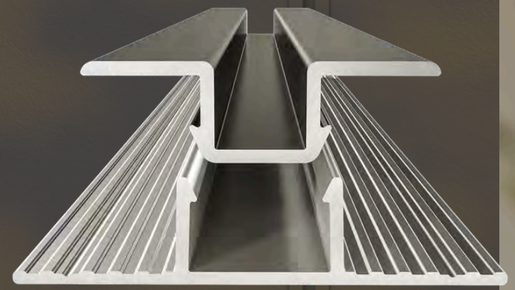

EZ.LOCK®

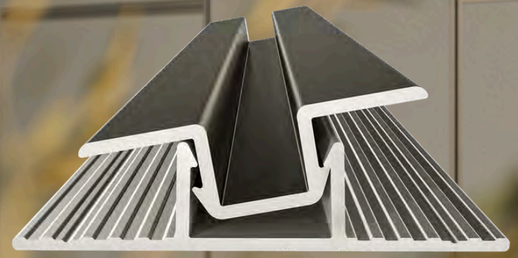

Installation designed around precision.

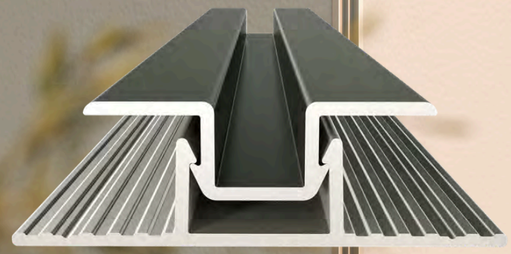

1. Backplate installed first
2. Siding set cleanly in place
3. Top cap snaps on

Benefits:

- Reduced install time
- Lower labor cost

Moisture Management

Moisture remains a leading cause of cladding failure.

EasyTrim Elegance integrates drainage pathways directly into the profile to:

- Move water away from the envelope
- Reduce standing moisture
- Minimize freeze–thaw damage
- Limit swelling, rot, and corrosion

Unlike single-piece trims dependent on caulking gaps, Elegance takes an intentional engineering approach.

Moisture Management

EZ.SLOPE®

An intentional 8° slope incorporated into horizontal trim surfaces.

- Encourages natural runoff
- Reduces dirt accumulation
- Maintains crisp reveal lines
- Minimizes long-term staining
- Preserves the appearance of the façade

EasyTrim® Elegance

Durability

EasyTrim® Elegance is manufactured from ultra-durable 6063-T6 aluminum engineered to withstand extreme weather conditions without compromise.

- Inherently corrosion-resistant
- Will not rot, warp, split, peel, or flake
- UV-stable finishes maintain long-term color integrity
- Full-edge protection shields vulnerable panel ends
- Designed to resist freeze–thaw deterioration

Sustainability

Aluminum is one of the most sustainable materials in modern construction.

- 100% recyclable
- Long service life reduces material replacement cycles

Durability reduces waste.
Longevity reduces lifecycle impact.

Elegance supports a building envelope designed to last longer and demand less over time.

Low Maintenance

EasyTrim Elegance minimizes maintenance through intelligent profile design.

- **EZ.Slope® technology** sheds water and grime from horizontal ledges
- **Integrated drainage channels** guide moisture away from cladding edges and trim interfaces, reducing standing water and dirt accumulation

Routine care is simple: an annual wash of exposed surfaces using mild detergent, warm water, and a soft, clean cloth is recommended.

System Compatibility

EasyTrim Elegance is compatible with 5/16″ panel and 3/4″ lap siding systems from every major manufacturer.

- All profiles come in 10’ lengths and are made from ultra-durable 6063-T6 aluminum
- Designed to perform across residential, multi-family, institutional, and commercial applications

5/16" Panel Trim System

The 5/16″ panel trim system is the foundation of EasyTrim.

- Designed specifically for panel cladding
- Clean edge definition & consistent reveals
- Protects panel edges from absorbing moisture
- Hides ugly field cuts

3/4" Lap Trim System

Purpose-engineered for lap siding.

- Slim defined edge detail
- Controlled shadow lines
- Protected terminations
- Crisp architectural finish

Panel to Lap Transition Trims

Where design shifts, control remains.

Our panel-to-lap transition trims create:

- Clean shifts between profiles
- Intentional edge definition
- Visual continuity across elevations
- Precise, engineered transitions
- Confidence at every change in plane.

New & Improved Paint

Elegance introduces a next-generation finish.

- Enhanced surface preparation
- Upgraded paint application process
- ASTM 5B adhesion rating

The result:

- Tighter bond to aluminum
- Improved abrasion resistance
- Reduced transport and install damage
- Long-term color stability

Powder Perfect™ Series

The Powder Perfect™ Series introduces seven new powder-coated finishes designed to match the most popular colors from the James Hardie® Statement Collection™.

Arctic White - Cobble Stone - Monterey Taupe
Pearl Gray - Aged Pewter - Iron Gray -
Rich Espresso

Upgraded powder-coating delivers:

- Best-in-class durability
- Abrasion resistance
- Long-term color stability

ColorMatch® Program

Unlimited Color Options with ColorMatch®

When standard doesn't fit the vision, create any color imaginable. Customize colors with our ColorMatch® system to complement your project design.

Available in powder coat and latex paint.

The ColorMatch® Program provides:

- Custom solid color production
- Accurate, repeatable color results

Why EasyTrim Elegance Wins

Traditional Trims	EasyTrim Elegance
Bulky profiles	Slimline tabs
Caulk-dependent	Mess-free installation
Single-piece installs	Two-piece assemblies
Reactive moisture control	Integrated drainage
Generic aesthetic	Refined architectural detailing

Resources & Customer Service

- Local Representation Across North America
- No-Charge Estimates
- Install & Project Support
- Management Support
- Online Resources

Warranty

15 YEAR WARRANTY

Every aluminum profile is backed by a 15-Year Limited Warranty.

Warranted against:

- Splitting
- Cracking
- Peeling
- Flaking
- Rust
- Oil Canning
- Abnormal weathering

Positioning Statement

EasyTrim Elegance is not decorative trim.

It sharpens geometry.
It protects vulnerable transitions.
It manages moisture intentionally.
It simplifies installation.

EasyTrim Elegance elevates the entire façade.
